

Educator Professional Development: AgriScience Fair Projects

A great professional development opportunity at Historic Fort Reno

Learn how to enhance the science that is already present in agriculture, as well as inquiry based pedagogical practices that teach students to think independently as problem solvers. This workshop is a unique opportunity to for teachers to get resources needed to implement science-based activities in the classroom. We will share lesson plans, laboratory exercises and teaching methods for agricultural sciences. Cost: \$25 (materials and lunch included)
